RICO Europe Newsletter – February 2023

Welcome to February's edition of our newsletter!

We are thrilled to bring you the latest updates and developments from RICO Europe.

In this issue, we'll be sharing the latest Filter Service Kits we've created as well as products we have on sale throughout the month of February.

Be sure to check out our video showcasing a Peljob service in action.

For both new and existing subscribers, we've highlighted some of the services that are available to you.

In this issue

- New Kits
- On Sale
- Delivery
- Click, Call, Collect
- Video

Groundcare Machinery Maintenance Tips

Groundcare machinery, such as lawn mowers, tractors, and hedge trimmers, is essential for maintaining a healthy and beautiful lawn, grounds or garden.

However, like any piece of equipment, regular maintenance is required to ensure that these machines are operating at their best and to extend their lifespan.

Read some of our tips and best practices for maintaining your groundcare machinery.

All About Generators and Their Filtration

Faced with the difficulties of energy supply, generators make it possible to be self-sufficient in electricity.

A generator (also called an electric generator) is an autonomous motorized device capable of transforming mechanical energy into electrical energy.

Appropriate solution for places not served by public electricity (for example on construction sites) or in the event of a power cut, the generators are used by industrialists, private or public strategic establishments (hospitals, military bases, banks , data centers, etc.) or individuals.
