>>> NEW: CROSS REFERENCE TOOL JUST GOT A MAJOR UPGRADE

Our Cross Reference tool now includes multi-line search and CSV upload, giving account holders more flexibility and faster results. You can still search by individual part numbers, too.

The newly revamped Cross Reference tool introduces three search options:

1 SINGLE SEARCH

Continue using the familiar one-part-number search for quick individual lookups.

2 MULTI SEARCH

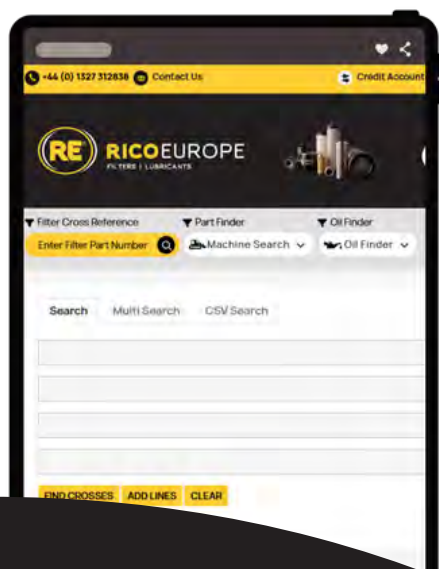

Account customers can now input multiple part numbers—separated by lines or commas—to return multiple results in one go.

3 CSV UPLOAD

Account customers can download a spreadsheet template, enter a list of part numbers, re-upload it, and receive results in bulk.

>>> WHAT THE NEW WINDSOR FRAMEWORK MEANS FOR OUR NORTHERN IRELAND CUSTOMERS

As a UK-based business, we regularly ship parcels across the country—including to our valued customers in Northern Ireland. With the introduction of the Windsor Framework, there are a few important updates we want to share.

The Windsor Framework replaces parts of the old Northern Ireland Protocol, aiming to simplify trade between Great Britain and Northern Ireland.

The good news? It's now easier to ship parcels to Northern Ireland without the same level of customs friction we saw before.

Here's what's changed and what it means for you:

1. GREEN LANE FOR GOODS:

Goods staying in Northern Ireland now move through a simplified "Green Lane." This means reduced paperwork and fewer checks for parcels that are clearly not heading to the EU.

2. LESS RED TAPE:

Goods staying in Northern Ireland now move through a simplified "Green Lane." This means reduced paperwork and fewer checks for parcels that are clearly not heading to the EU.

3. FASTER DELIVERY TIMES:

With fewer delays at the border, parcels should arrive more smoothly and quickly—great news for everyone.

What You Need to Do:

Nothing changes for you as our customer. Just place your order as usual. We handle the rest. If any extra information is ever required, we'll reach out directly.

We're committed to making the shipping process as seamless as possible, and the Windsor Framework helps make that easier. If you have any questions about deliveries to Northern Ireland, feel free to contact us.

>>> CASE CX-SERIES FILTERS, SERVICE KITS & LUBRICANTS

The Case CX-Series is a range of excavators built for power, reliability, and precision across demanding applications—from site preparation to large-scale earthmoving.

Recognised for fuel-efficient engines, responsive hydraulics, and smooth control, CX-Series machines deliver excellent digging force and cycle times, helping operators achieve high productivity with minimal downtime.

With models ranging from compact to full-size excavators, the CX-Series offers the versatility to handle everything from tight urban projects to rugged construction environments.

Our range of filters and lubricants is designed for Case CX-Series machinery, ensuring consistent performance, protection, and long service life under heavy workloads.

HIGH-QUALITY FILTERS FOR CASE EXCAVATORS

Keep your Case CX-Series performing at its best with our full range of filters.

Designed to fit your model perfectly, they protect critical systems and extend machine life."

ALL-IN-ONE MAINTENANCE - SERVICE KITS

Save time and ensure reliable servicing with our complete kits for the most popular Case CX excavators. Each kit includes everything you need in one box.

LUBRICANTS - ENGINEERED TO PERFORM

Our premium lubricants are specifically matched to Case CX-Series performance needs. Protect critical components and reduce wear in tough working conditions.

WHY CHOOSE RICO EUROPE?

TRUSTED SUPPLIER FOR CASE CX-SERIES FILTERS AND LUBRICANTS

- ✓ **HUGE STOCK RANGE FOR CASE CX-SERIES MODELS**
- ✓ **OEM-QUALITY AT AFFORDABLE PRICES**
- ✓ **FAST UK-WIDE DELIVERY**
- ✓ **TRUSTED BY PLANT HIRE, CONSTRUCTION, AND CIVIL ENGINEERING SECTORS**

>>> SUMMER SERVICING TIPS

When summer hits, everything speeds up—harvest schedules, construction timelines, and machinery workload. But while your business picks up pace, your machinery can start to slow down or wear out faster if it isn't properly serviced.

At RICO Europe, we know that keeping your equipment running at peak performance starts with timely servicing and high-quality lubricants.

HEAT INCREASES THE PRESSURE

When summer hits, everything speeds up—harvest schedules, construction timelines, and machinery workload. But while your business picks up pace, your machinery can start to slow down or wear out faster if it isn't properly serviced.

At RICO Europe, we know that keeping your equipment running at peak performance starts with timely servicing and high-quality lubricants.

WHY SUMMER LUBRICANT CHANGES MATTER

As temperatures climb, oil viscosity can change, especially if it's not designed for high-heat performance. Using the wrong oil—or old, degraded oil—can mean reduced protection for your machinery and higher fuel consumption.

This is where our partnership with **EXOL Lubricants** makes a real difference. EXOL's high-performance oils are engineered to handle extreme conditions.

Whether you're running tractors through long days in the field or powering excavators on a job site, the right oil will keep your equipment cooler, cleaner, and more efficient.
